Mayor's Message

Welcome to the summer of 2022. Please plan to join your friends and neighbors first thing in the morning on the 4th of July for our annual 4th of July parade and pet parade that afternoon. Also, we will be enjoying the live music of “Dave & Bethany” before the fireworks over Lake Cheerful that evening. To add to the fun of the day, at the last city council meeting the council approved a free boating & fishing day on the 4th. Please note you will still be required to have a valid state fishing license and the Lake Cherful boat ramp and parking lot will be closed for vendor/stage set up all day on the 4th. Thanks to all who stepped forward to make this one of the best community events of the year.

After having the first meeting of the Oktoberfest committee we determined the date of October 22nd for this year's fall Oktoberfest. Members of the committee are working on having more music, more vendors, and more choices for food & beverage. I'll keep you posted.

We have good news for our Cherokee county citizens as we were able to reach a new agreement with the Cherokee County Commissioners for SPLOST in only three meetings. Now if we could get Fulton County to follow this example that would be awesome. I will be sure to keep everyone posted as things move forward with Fulton County.

I want to personally send out a “Thank You” to one of our neighbors from Mountain Park Overlook named Chris. Unfortunately, I was unable to get his last name during the chaos, but Chris and his family are members of our City pool and happened to be there right at the same time that we had an emergency in the Park which required me to retrieve the AED from the pool area. As Chris saw what I was doing, he immediately came forward and offered his military EMT training assistance. It was a huge comfort for the family of the person in need and a huge help for me until emergency services could arrive and take over. Everyone is okay and I am glad to know that we have people who are willing to step up to help even when it's not their job.

Have a safe and enjoyable summer and Happy Fourth of July.

MPVFR NEWS

MPVFR Training Day:

PUMP OPERATIONS, FIRE HOSE HANDLING, NOZZLE OPERATORS AND BACKUP FIREFIGHTERS

Top: 1) Chief *Craig Miceli* goes over pump operations as recruits look on. **2)** Lt. Barrett Kreiner operates the pump as Lt. *Michael Peck* looks ahead as they operate the hose.

Bottom: Recruit *Josh Estrada* practices the kneeling position while operating the nozzle with proper contact and pinch points. Recruit *Elliot Robinson* as the backup firefighter is supporting the operator in multiple ways: directing a majority of the nozzle energy towards the ground, acting as a solid point of contact for the operator (reducing fatigue), and creating additional hose pinch points with both legs and arms (allowing the operator more hose control).

MPVFR is currently looking for volunteers!

For more information, please contact mpvfr@mpvfr.org

To become a full-fledged member, candidates must pass a physical agility test, the state's volunteer firefighter program and/or emergency medical responder course.

Already certified and interested in volunteering?

Would you or someone you know like to be a firefighter or medical responder?

A Note from the City Arborist

Damage by the solitary oak leafminer on white oak.

RE: Leafminer and Leaf Hopping Oak Gall.

As you may have noticed over the last several weeks, our (mainly) White Oaks have undergone quite a bit of change from being attacked by what's being identified as Solitary Oak Leafminer, and Leaf Hopping Oak Gall.

Solitary oak Leafminer, are small caterpillars that feed on the outer layer of oak tree leaves. As they are feeding, they form an irregular area that looks like small mines (easily seen under microscope). Heavy infestations cause browning and premature leaf drop. This injury is usually considered unsightly, but if the infestation is bad enough the leaves may die, but overall, the health of the tree is likely not compromised. Leaf Hopping Oak gall, if severe enough, will follow a similar path. With the Gall I haven't noticed as many generations in one year.

It is important to note that, if your more mature trees are already experiencing health concerns or have been impacted by other diseases, insects, or construction injury/stress you may need to have them looked at by a senior certified arborist. Treating or improving the trees health may help keep the tree(s) from going into an irreversible decline. However, be very cautious and suspicious if someone recommends removal immediately based off just hearing about the infestation.

And... As always, don't guess at any of the injuries or problems you see with your specimen trees (or any of the trees for that matter), as it may very well be a sign of an even more dangerous or problematic situation (with that tree).
